UNIMAX SURGICAL **TROCAR**

Thoracic trocar   Hasson trocar   Auto locking trocar   Secondary trocar   Bladeless trocar   Visible trocar

UNIMAX VISIBLE TROCAR

· Provides safe entry into the peritoneal cavity
· Reduces trocar-related injuries
· Reduces scarring
· No fascial closure is required
· Less pain and herniation rate

Accommodated with universal seal for the entry of 5-12mm instruments

Clear cannula for better visualization
Ribbed cannula for optimal attachment

Ergonomic handle design ensures ease of insertion

Clear tip allows direct visualization of the abdominal wall layers

Detachable clear cannula head enables easier specimen retrieval

SINGLE
PORT

SINGLE PORT

Single site access device enables speedy device set-up and removal, which simplifies process and remarkably promotes efficiency in the procedure.

Quick fixation ring enables fast device set-up and easy specimen removal

Adjustable retracting sleeve suits varying abdominal wall thickness (up to 20cm) and allows quick device anchoring

Funnel shaped ports facilitate one-handed instrument insertion

Removal strap for quick removal of device

4 integrated self-retained ports allow insertion of 4 instruments through small incision and eliminate interference of trocar cannulas

Extension lines for abdominal insufflation and smoke evacuation

Includes Introducer for easy set-up

ENDO POUCH SERIES

Endo pouch with introducer

Endo pouch with suture tie

Endo pouch with memory wire

BENEFITS OF DETACHABLE ENDO POUCH

Unimax detachable endo pouch is a patented device which provides a quicker and easier application of endo pouch. This unique design allows the pouch to be detached from the introducer and left within Patient body during procedure. Consequently, it increases the convenience of procedure and shortens the procedure time.

· Unique patented design ensures ease of use
· 10mm introducer provides ease of insertion
· Self-opening pouch design provides easy and safe specimen capture
· High strength PU pouch material assures no leakage
· Enhanced metal ring ensures large pouch opening and keeps the pouch in place when loading specimen

CLOSED SUCTION CATHETER

Unimax Closed Suction Catheter provides safe and easy access for secretion removal from the airway to minimize infection and maximize diffusion of oxygen through the lung.

• Catheter with centimeter markings allows proper insertion depth in the airway
• Transparent and durable sleeve facilitates catheter manipulation and prevents infiltration of blood and sputum

Irrigation port with one way valve allows lavage and irrigation which prevents secretion infiltration and ventilation leakage to maintain proper airway pressure

360° swivel elbow enables rotation for enhanced patient comfort and reduces torque

ISO color coded button for instant recognition of catheter diameter (ISO 8836: 2009)

Tethered cap for vacuum connection closing provides full safety

MDI port provides an effective, quick and convenient way of drug delivery

• Smooth and soft catheter tip reduces damage to mucous membranes
• Lateral eyes improve airflow and provide diverted fluid path when tip occlusion occurs
